

M. Steele Shown

503-327-3051 - ms.shown02@gmail.com - www.linkedin.com/in/steele-shown

OBJECTIVE

Mechanical engineering graduate student seeking an entry-level position in mechanical or product engineering. Experience in mechanical design, electromechanical system integration, prototyping, and experimental testing through research and embedded system development.

EDUCATION

MEng Mechanical Engineering - Design Option, Robotics minor - 3.85

Expected June 2026

Oregon State University, Corvallis, OR

- Relevant Coursework: Modern Product Design, Design of Mechanisms, Materials Selection, Lean Manufacturing, Optimization in Design, Robotics 1 & 2.

BS Mechanical Engineering - Sciences Option - 3.96

June 2025

Oregon State University, Corvallis, OR

- Relevant Coursework: Mechanical Component Design, Mechanics of Materials, Instrumentation, Intermediate Dynamics, Thermodynamics 1 & 2, Fluids and Heat Transfer.

EXPERIENCE

Graduate Research Assistant

February 2025 - Present

Oregon State University, Corvallis, OR

- Integrated multi-sensor systems onto robotic platform for 360-degree environmental perception, including mechanical layout, mounting hardware, wiring, and UI components.
- Developed, tested, and iteratively refined system performance, supporting mechanical and control system integration through prototyping and validation.

Teaching Assistant

September 2023 - June 2025

Oregon State University, Corvallis, OR

- Supported instruction and grading in Python, data analysis, and instrumentation classes for groups of 30-100+ students, mentoring students in both laboratory and office hour environments.

Capstone Design Project - Competitive Sumobot

September 2024 - March 2025

Oregon State University, Corvallis, OR

- Designed and fabricated a competitive robotic platform on a 3-person engineering team, focusing on mechanical structure, drivetrain design, and system integration.
- Developed and tested control logic on an ESP32 using BLE to coordinate 5 DC motors and high-torque servos.

Restoration Intern

Summers 2022 - 2024

TA Cycleworks, Vancouver, WA

- Restored and modified a 1978 Suzuki GS550E, integrating and troubleshooting mechanical and electrical subsystems through drivetrain analysis, custom fabrication, welding, and electrical rewiring.

SKILLS & ABILITIES

Mechanical Design: SolidWorks, Fusion 360, Siemens NX, Mechanical Component Design

Manufacturing & Materials: Materials Selection, Machining Processes, Lean Manufacturing

Systems & Controls: Microcontrollers, Control Systems

Programming: Python, MATLAB, Arduino IDE, ROS2

Engineering Tools: Microsoft Excel, Word, and PowerPoint; Hand, Power, and Hydraulic Tools

PASSIONS

Endurance sport events: 78 half marathons across all 50 of the United States, numerous Spartan Races, Abbott World Major Marathons, and triathlon training.
